DETAILED ACTION
EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with **Mr. Keith Townsend, Reg. No. 40358 on 1/7/09.**

The application has been amended as follows:

Line 3-4, of claim 5 & 13, following "computer," [[[delete the empty space]]] comprising at least switches

Line 7 of claim 5 & 13, following "(1)" [[the]] frame members [[that]] form an outline of the solid shape

Line 2 of claim 7, following "(1) the" left and right side first angle panels

Line 11 of claim 9, following "affixed to the" left and right side first and third angle panels

Line 12 of claim 9, following "the" large and small disk drives

Line 2 of claim 13, following "and into" [[chich]] which

The Abstract has been amended as follows:

Line 1, [[A case for a computer is structured such that it can be freely designed and easily assembled or disassembled by a user. Desired functions can be freely assembled in the case, and the case is light in weight and compact. The case has a solid shape formed by a plurality of outer panels assembled together and into which are installed bays for mounting modules for computer. Switches and insertion/removal openings for external storage modules are at least provided on front side of the case, and connectors are at least provided on rear side. The outer panels are removably installed with screws on the outside of frame members that form outline of the solid shape. The frame members comprise outer

frames that are arranged so as to form outline of each face of the solid shape, and corner parts that are arranged at the corners of the solid shape and connect adjacent outer frames. The outer frames and the corner parts are assembled with screws so that they are easy to disassemble.]] A case for a computer has a solid shape formed by outer panels assembled together into which are installed bays for mounting modules. Switches and insertion/removal openings for external storage modules are provided on front side of the case. Connectors are at least provided on a rear side. The frame members comprise outer frames that are arranged so as to form an outline of each face of the solid shape. Corner parts are arranged at the corners of the solid shape and connect adjacent outer frames.

Allowable Subject Matter

2. Claims **5-10 & 13** are allowed.
3. The following is a statement of reasons for the indication of allowable subject matter: the allowability resides in the overall structure of the device as recited by independent claims 5 & 13, and at least in part, because **Claim 5** recites: "a pair of left-side and right-side first angle panels and second angle panels that (a) are arranged across two vertically stacked large disk drives and sustain the two drives from their respective sides and affixed to top face of a bay fixing panel that is affixed to an outer frame that forms bottom plane of the case, left and right side third angle panels, wherein a plurality of second angle panels that have the same shape as the aforementioned second angle panels, can be installed consecutively (1) by being arranged across vertically adjacent two of a plurality of third left-side and right-side third angle panels that have the same shape as the aforementioned third angle panels, and that sustain one by one a plurality of small disk drives that are stacked successively on the aforementioned small disk drive from their respective sides, and (2) by fixing the two adjacent third angle panels," and **Claim 13** recites: "large and small disk drives are assembled, being affixed by using screws to the pair of left-side and right-side panels and the pair of left-side and right-side third angles." The aforementioned limitations in

combination with all remaining limitations of claims 5 & 13, are believed to render the claims 5 & 13 and all claims dependent thereupon, patentable over the art of record.

US 6168249 B1 to Chien is considered a close reference to the instant application, as Chien disclosed corner parts (114,111), a solid shape (i.e. solid shape of frame (1)), fig. 1, Chien), a case (i.e. casing formed by frame (1)) and outer panels (113), but is silent as to right side angle panels.

US to 6049452 to Yuan et al. is considered a close reference to the instant application, as You disclosed a first case (10), a second case (18) and a plurality of left and right side angel panels (fig. 1, Yuan), but is silent as to the right and left side angle panels being affixed to the outer frame.

US 5020866 to McIlwraith is considered a pertinent reference to the instant application, as McIlwraith disclosed corner parts (25) with screws and outer frames (27,26), but is silent as to right and left side angle panels being affixed to the outer frames, via screws.

None of the aforementioned references, either alone or in-combination, are believed to render the present invention, unpatentable as claimed.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to INGRID WRIGHT whose telephone number is (571)272-8392.
